“One belt One Road, Sichuan Opportunity” Series Report of West China City News

Interview with director-general of Provincial Department of Sichuan

65 trade and investment activities carried out along the “one belt one road” in 2015

Director-general of Sichuan Provincial Department of Commerce Mr. Xie Kaihua was interviewed by West China City News.

He said: the strategy of “one belt one road” is a huge opportunity for Sichuan, which will form a new opening pattern. At this moment, the department of commerce is drafting the promotion plan for the “participation of the foreign economic cooperation in the one belt one road strategy”; the plan probably will be announced next month.

The department of commerce will adopt 6 measures to carry out the “one belt one road” strategy. According to the preliminary plan, Sichuan plans to promote the cooperation with 20 important countries, to cultivate 50 important projects, to lock up 100 enterprises to join the “one belt one road” strategy in 3 years. Sichuan will try to reach 10 billion US dollars in the foreign trade turnover. This year the number of trade and investment activities along the “one belt one road” will be over 65.

Investment policies and developments in Chengdu:

Foreign Investment Grows in Chengdu

www.gochengdu.cn

The megacities of Beijing, Shanghai and Guangzhou have always attracted the bulk of investments in China. But increasingly, foreign investors are looking elsewhere in the vast country for opportunities — the number of Singapore firms in Chengdu, for instance, grew from 299 in early 2013 to 384 by the end of 2014, a 28 percent increase.

President of Enveesoft Mr. Darrel Chua, has had over 20 years of experience in in-flight entertainment. About five years ago, he ventured to China to develop mobile and in-flight entertainment content. But rather than start his business in the mega-cities of Beijing, Shanghai or Guangzhou, he opted for the western Chinese city of Chengdu. Mr. Chua said: “Chengdu probably helps us save about 50 percent of labor costs, compared to Beijing and Shanghai.” Mr Chua’s firm is among a rising number of Singapore-linked companies drawn to Sichuan province, where Chengdu is located in. In June 2012, Singapore had a total of 454 projects in Sichuan, but this rose to 482 by the end-2013 — a six percent increase. As of 2014, total Singapore investments in Chengdu reached 650 million US\$. One of the most high-profile Singapore investments is the 1,000 hectare Singapore-Sichuan Hi-tech Innovation Park. It is the first large-scale Hi-Tech park jointly developed by Singapore and Sichuan. CEO of Singapore-Sichuan Hi-tech Innovation Park Mr. Cui Wei said: “For the first 30 years, China’s reform and opening up was mostly in the coastal regions, but for the next 30 years, the western region will play a more important role.”

Chengdu’s GDP Reaches 246.23 Billion in First Quarter of 2015

Chengdu Economic Daily

According to information office of Chengdu Municipal Government, after preliminary calculation, for the first quarter of 2015, Chengdu’s GDP is 246.23billion Yuan.

Link: http://e.chengdu.cn/html/2015-04/29/content_518738.htm

Foreign Trade Value of Chengdu Reaches 73.4 Billion Yuan in the First Quarter of 2015

Chengdu Daily

According to the Sichuan Foreign trade statistics released in a press conference held by Chengdu Customs: In the first quarter of 2015, the imports dropped compared to the same period of last year, the exports kept the same level, while the profit of exports has risen. The total foreign trade value of Chengdu reaches 73.4 Billion Yuan in the first quarter, with total value of 51.3 billion Yuan in export and 22.12 billion Yuan in import.

The total foreign trade value of Sichuan reaches 97.46 billion Yuan, with export of 71.37 billion Yuan and import of 26.09 billion Yuan.

Chengdu Attractive to International Businesses

China Daily

“Chengdu expects to welcome more foreign companies as it forms closer connections to the outside world and increases business opportunities,” said Mayor Tang Liangzhi.

As a transportation hub of the new Asia-Europe Continental Bridge, Chengdu has a solid logistics industry, favorable policies and promising market prospects, all of which make the city the most attractive place in Southwest China for international businesses, Tang said.

According to the local statistics bureau, foreign investment in the city reached \$10 billion last year.

In December, Intel Corp announced it will invest 1.6 billion \$ over the next 15 years to upgrade its semiconductor plant in Chengdu and introduce its latest advanced testing technology.

In the same month, Tesla Motors, a California-based electric vehicle design and manufacturing corporation, opened its second-largest sales center in Chengdu.

"Chengdu has an advantage that many cities in China don't have," said Charles Cheung, managing director and executive director of Dell China. Founded in 2013, Dell's operation center in Chengdu has an area of 30,000 sq.m. "Chengdu is a city with a long history and a variety of talents. With its growing advantages, from the humanities to the natural environment, it has become a new economic power in China's western cities. As a key western city, Chengdu has always been the focus of Dell and the world, and we are fully confident in its future " said Cheung. Chengdu also plans to speed up the development of its cloud computing applications and industry in the country's 12th Five-Year Plan period (2011-15).

The plan is to have the value of the cloud computing industry reach 300 bl RMB within several years, making Chengdu one of the world's largest manufacturing bases of cloud services and end products. In 2013, Siemens' first oversea digital enterprise opened in Chengdu.

Marc Wucherer, president of Industry Sector Siemens North East Asia, said the importance of Chengdu in western China, backed by top-grade governmental support, human resources, logistics, traffic and infrastructure, provide a sound environment for Siemens to be based in Chengdu. "Currently, the logistics channel in Chengdu covers sea, air, trucks and railway transportation."

Among that, Chengdu-Europe Express Rail that began operation in 2013 offers the most convenient and stable channel linking China and Europe with the shortest travel time.

The express rail is expected to open return service in the first half of this year," Tang said. Chengdu Shuangliu International Airport is the largest in China's central and western regions, with 80 international routes linking the city to locations including London, Amsterdam, Frankfurt, San Francisco and Melbourne.

The Chinese government recently approved the construction of a new airport in Chengdu, which will make it the third city on the Chinese mainland to have a second airport, after Beijing and Shanghai.

The new airport is expected to go into use during China's 13th Five-Year Plan (2016-20), handling 40 million passengers a year by 2025 and 80 million to 90 million passengers a year after full completion.

"The city will continue to upgrade its logistics system, improve customs clearance efficiency and raise the standards of service, making it the regional logistics center of western China and a global logistics hub to Europe and Asia. Our ultimate goal is to build Chengdu into a cargo hub connecting the world," Tang said.

Tang said the national strategies to develop the Silk Road Economic Belt, the Yangtze River Economic Belt and Tianfu New Area offer Chengdu a historic opportunity to achieve industrial transformation and upgrading.

At the beginning of this year, Tang sent an invitation to entrepreneurs around the world, inviting them to share the city's opportunities and develop win-win cooperation. "We will provide entrepreneurs with greater development space, a better business environment and a more dynamic innovation atmosphere," he said.

Tang attaches vital importance to innovation and entrepreneurship as he believes that under China's "new normal" era of development, the economic growth pattern should change from being driven by production factors and investment to become innovation-driven, and innovation and entrepreneurship will be major driving forces to transform and upgrade the economic structure.

The city has the largest number of universities and colleges in western China, producing at least 150,000 graduates and 100,000 technicians every year. Most of those choose to stay in Chengdu.

By the end of last year, Chengdu had 1.5 million professional and technical personnel, more than 30,000 technological enterprises, and 84 innovation and entrepreneurship sites, covering 2.8 million square meters in total. The city officially launched the "Entrepreneurial Tianfu" program early in February. This aims to encourage university students, scientific and technological talent, and top overseas talent to start businesses, and venture capital and top entrepreneurs to invest in Chengdu, to boost the development of the innovation and intelligence industries.

According to the program plan, Chengdu will establish an entrepreneurship support system by 2020, with 200,000 scientific and technological entrepreneurs.

It aims to become an internationally renowned city of entrepreneurship and a "dream-realizing city" by 2025.

"Chengdu warmly welcomes scientific and technological innovation enterprises and talents," Tang said.

"At the same time, we have given our commitment to creating a better investment environment, building the city into a world-class supply chain ecosystem, as well as making the electronic information industry a key development direction."

TSP Tops China's Service Outsourcing Parks

www.gochengdu.cn

The Chengdu Tianfu Software Park (TSP) holds the first place in the rankings of China's Top 10 Service Outsourcing Parks, surpassing its counterparts in Shanghai, Beijing and Xi'an, announced organizers of Devott Global IT & Sourcing Leadership Summit, which was held March 21-23 in Hefei City in Anhui Province in eastern China.

The summit was sponsored by Devott Research Institute and www.chnsourcing.com.cn, and the rankings are the result of a 4-month assessment based on online polls and the judging of a jury of

industrial experts. Indexes of the assessment included those on overall competitiveness, industrial competitiveness, environment, policy making, service efficiency and investment potential etc, covering a wide range of sub-level indicators such as the size, infrastructure, IPR and brand value.

Officials of TSP, which is located in Chengdu Hi-tech Industrial Development Zone (CDHT), said the strong support and a series of attractive policies by Chengdu government and the administration of CDHT had proved to be the powerful force for the remarkable development of the software park in recent years. 21 of the 100 leading outsourcing companies in the world have so far settled in Chengdu, mainly at TSP. Global outsourcing giants IBM, Accenture and Wipro have established RD centers in the city.

SCU, Chengdu Team up for Science Park Initiative China Daily

Sichuan University will invest 400 million Yuan (64.4 million \$) to build a science park to attract scientists and researchers from world-famous institutions.

"They will conduct research and development, and turn the fruit of that work into products," said Xie Heping, president of Sichuan University.

The park's construction will be part of an initiative to turn Chengdu into a science city, transferring projects and selling the discoveries to different parts of the world, he said.

Xie, a member of the Chinese Academy of Engineering, was named Man of the Year of 2014 in science by China Science News, sciencenet.cn, Medical Science and Science News as his research group had proposed directly harnessing chemical energy produced by mineralizing carbon dioxide into electricity.

The 119-year-old Sichuan University emphasizes the importance of scientific innovation. According to university official Zhang Yun, it has offered 1,380 theoretical courses on innovation and entrepreneurship for students.

"World-famous scholars and business executives present courses on what it takes to be an executive or how to establish and operate businesses," Zhang said.

The university, together with the Chengdu municipal government, has set up a 100 million Yuan fund to encourage innovation and entrepreneurship. It has participated in the 500 ml RMB Wanda Entrepreneur Fund.

In September 2013, Wanda Group, in Dalian, Liaoning province, launched a 10 year plan that, from 2013 to 2022, it will help 1,000 graduates to start businesses, putting at their service a 500 million Yuan fund and at least 500 Wanda Plaza shops.

Last year, it started a project giving 50 million Yuan to 100 new university graduates to give them the chance to start their own business in one of the 50 Wanda mall retail outlets throughout China.

The initial candidate selection took place in 2013 at Peking University, Tsinghua University, Fudan University, Tongji University, Zhejiang University, Wuhan University, Sichuan University, Xi'an Jiaotong University, Dalian University of Technology and Zhongshan University.

Sichuan University has planned the construction of office space for students to experiment with the starting businesses on its Wangjiang, Huaxi and Jiang'an campuses.

"For example, it built 1,800 sq.m of office space on the Huaxi campus, providing offices, a legal consultation room and a meeting room for seminars on how to start a business. Now 24 teams of student entrepreneurs are using the space," Zhang said.

Twenty two Rhodes scholars from New Zealand, the UK, the US, South Africa and other countries and regions had a meeting with hundreds of listeners aspiring to start up their business at a lecture called Entrepreneurial Tianfu · Jing Rong Hui – Interactive Communication at Thinkzone in Chengdu Hi-tech Industrial Development Zone.

The meeting lasted almost for 4 hours with lively talks and discussions on career designs, startup concepts and experiences.

“All the attending Rhodes scholars have startup experiences,” said Samuel Galler, leader of the delegation, “We are glad to share our experiences with young people in Chengdu, and we can also learn from each other.” Samuel Galler is a student in the University of Oxford, majoring East Asian studies and studying the Chinese language. He visited China several times and worked as a volunteer at schools in Wenchuan County in 2010.

Rhodes Trust announced on March 30 that scholarships will be available for students from the Chinese mainland. The Rhodes scholarship is an international postgraduate award for selected foreign students to study at the University of Oxford. Established by Cecil Rhodes in 1902, it was the first large-scale program of international scholarships.

[Agriculture industry and Agritech Coverage:](#)

West China Metropolis Daily published a series of 3 articles about Agritech by chief journalist Li Fengchun in the special edition page. Chief journalist Li Fengchun was invited to Agritech by the Israeli consulate of Chengdu. Here is a short review of each article.

Journalist Mesmerized by the Charm of Israeli Agriculture Technology- agricultural technology farms in southern land of Israel and a “Dujiangyan dam” hidden in the Soft Drip Irrigation Tube.

Introduction: Without a naturally fertile land, and only relying on science and technology, Israel has earned many good reputations: "let the desert blossom", "milk and honey land", "European's winter kitchen", "the country of innovation". On April 30th, together with correspondents from Russia, Germany, Columbia, Vietnam and other countries, journalist from West China Metropolis Daily visited the southern land of Israel. Once it was the barren land, now it is the legendary paradise of Israeli Agriculture. The world's top drip irrigation system manufacturers, milk suppliers, and most prominent Israeli farms are located here. Reporters were mesmerized by the charm of Israeli agricultural science and technology.

Content: 1) A micro “dujiangyan dam” hidden in the magic valve of drip irrigation tube (visit to NETAFIM). 2) Happiest cows on earth (visit to AFIMILK)

Israel Research about Food Storage and communication with Sichuan Enterprises.

Interview with Minister of Agriculture Mr. Yair Shamir

West China Metropolis Daily

Introduction: The first President of Israel, Professor Chaim Weizmann said: "give us a bowl of water and seeds, and our nation will survive” Why did Weizmann have such confidence and

assertiveness? There may be just one answer: the highly developed, world leading agriculture of Israel. This is an "innovative country", the greenhouse; drip irrigation system; waste water management and modern cultivation technology are the most well-known technologies of Israeli agriculture, which attract all countries to learn from Israel, including China. From April 28th - 30th, the 19th international agricultural exhibition & conference will be held in Tel Aviv, Israel. As the only media from West of China, West China Metropolis Daily was invited to attend the exhibition and under the organization of Israeli government, will visit many unique and innovative agricultural technology companies.

Content: 1) Explore new technology of food storage to prevent great loss due to transportation; 2) Close Cooperative relationship between governments, research institutes and farmer organizations is to transfer the research into commercial use instead of producing more essays. 3) Yair Shamir has been the “guide” for Chinese enterprises since he visited China in 1987 and has always happily given advice to Chinese agriculture companies.

Import Israeli Drip Irrigation System, Western Panzhihua Will Build Demonstration Farm. Interview with deputy director-general of Sichuan Agricultural Department West China Metropolis Daily

Introduction: In the 50s of last century, the primary founder and the first Prime Minister of Israel David Ben-Gurion said:” let the flowers blossom in the desert”. It seems it’s an unrealistic hope; however Israel used their talents and tube to realize the dream at last. The accurate drip irrigation technology has brought about the suitable living environment and crops, vegetable and fruits being planted on the land.

Under the invitation of Consulate General of Israel in Chengdu, Sichuan Agriculture Department organized a group of famous Sichuan agricultural enterprises to attend the exhibition. As one of important strategic projects of the “one belt one road” Sichuan agricultural industry, Sichuan will import the latest drip irrigation system and build a demonstration farm in western Panzhihua.

Content: 1) similar climate conditions between Western Panzhihua and Israel, Panzhihua will import drip irrigation system to build demonstration farm. 2) Organizing Sichuan enterprises to go out of Sichuan

Academia:

Granted the accreditation of EQUIS, Southwest University of Finance and Economics also offers the course of “entrepreneurship”

Chengdu Economic Daily

According to Southwestern University of Finance and Economics, School of Business Administration (SBA) of Southwestern University of Finance and Economics (SWUFE) receives the European Quality Improvement System (EQUIS) accreditation for a three-year term from European Foundation for Management Development (EFMD). The accreditation confirms that SBA is the first business school in west China to be awarded this internationally recognized symbol of excellence.

In addition, the school will add a course of “entrepreneurship” in the business management major from this fall semester.

This is the first course of “entrepreneurship” provided at the High education Institute in Sichuan. The direction of training will be based on the local community and the teaching emphasis will be aimed at development of small and medium-size enterprises.

2.7L Prado to Roll off Production Line in Chengdu

www.gochengdu.cn

Sichuan Faw Toyota Motor Co., Ltd. (SFTM) announced it will be the first factory in China capable of manufacturing the model of 2.7-liter Prado by the end of this month.

This is the result of the expansion of SFTM, which began in October 2013 and involved an investment of RMB1 billion (US\$160 million). The factory, located in Chengdu Economic & Technological Development Zone in eastern Chengdu, will increase to its production the capacity to make 20,000 the 2.7-liter Prado. “The home-made Prado will have the high quality up to its global standard,” said relevant officials of the factory.

SFTM is the Toyota's first joint venture project for vehicle production in China, and its production is backed up by Toyota's technology and standardized quality system.

Chengdu-Moscow Direct Flight to Open in May

www.gochengdu.cn

Sichuan Airlines Co., Ltd. said on March 12 that the direct air service between Chengdu and Moscow will be launched on May 2.

The direct flight is the first between Russia Federation and western China. After the direct flight is put into service, Chengdu will have 4 international air routes linking Europe.

An official from Sichuan Airlines said that the company has signed cooperation deals with China Youth Travel Service to operate chartered flights to Moscow, which provide individual travelers who have booked the tickets from airlines and ticket agents for non-stop flights between Chengdu and Moscow.

The Airbus A330 will fly the route, which will be three times a week, and one-way flying time is about 8 hours.

Chengdu has so far opened over 80 international air routes.

Tourism:

Chengdu Hotel Industry seeing more foreign investment

The hotel industry is seeing more foreign investments. Five years ago, there were about six five-star international hotels in Chengdu. Now, there are 10. Experts say connectivity is crucial to the further growth of the industry.

“In my opinion, it is important that the government is willing to open up the international market. For example, if you don’t have more international direct flights coming into Chengdu, then it will hinder the progress of the city,” noted Mr. Francis Kan, General Manager at Millennium Hotel. “You can open up many other hotels, but the pie is only that small. If you open up more international flights, the pie gets bigger, so everyone gets a better share,” he added.

Earlier this year, authorities approved a new 11.2 billion US\$ airport for the city. When ready in 2025, Chengdu will become the third major Chinese city — after Beijing and Shanghai — to boast a second airport. By then, Chengdu will already be home to more Singapore investments.

Chengdu is one of three locations in Western China being considered for a third government-to-government project between Singapore and China, the other two cities being Xi’an and Chongqing. While not much has been revealed publicly about the project, it is known that it will revolve around the theme of connectivity and modern services.

The project plan is expected to be completed by the end of 2015.
