Fazer Mill & Mixes – Finnish milling expertise since 1971 and part of the Fazer Group. Fazer Group has grown into a 1.7 billion EUR international multi-business corporation. Today Fazer offers bakery, confectionery and biscuit products as well as food and café services.

Fazer Mill & Mixes product portfolio includes high quality flours, mixes, oat products and special ingredients. These newly available special ingredients include oat beta-glucan, oat protein and oat oil, which are all natural, plant-based and good for the heart. The product range is wide and can be tailored to fit customers’ specific criteria. Everything is made out of natural ingredients following strict standards.

Fazer Mill & Mixes’ products are exported to over 30 countries (to European, Russian, Asian and North American markets). Our production process is audited annually by American Institute of Baking (AIB); Halal and Kosher certificates.

## PRODUCTS

1. Oat-cookies, oatbread, baked goods, sweets, porridge
2. Bread mixes, bread improvers, tuners, wheat, rye, special flours
3. Blends, flakes and groats, rye fibre, oats

## SPECIALITY

125 years heritage of confectionery making with a focus on premium quality. Very diverse brand and product portfolio

### Oats <3 Beans

Gold&Green is a radical novelty on your plate. It's not made of soy or wheat gluten. Instead, Gold&Green is made of oats and beans. Oat is the Northern superfood. It has amazing effects on the heart health, blood sugar and digestion. Oat is also one of the most ecological crops in the world. At the end of the fork oats & beans are yin & yang, forming together the perfectly balanced protein and a tender, juicy food structure.

### Make my veggie day

Our secret is to collide the pure, clean Nordic oats with some age old Asian production methods. The result is completely new. Our products have approx 30% of good quality protein, combined with good fatty acids and fibers. You can finally say goodbye to the boring minced meat on Mondays, and the tasteless soy strips as the only vegetarian option. Plant based food that satisfies like good food should - it's finally here.

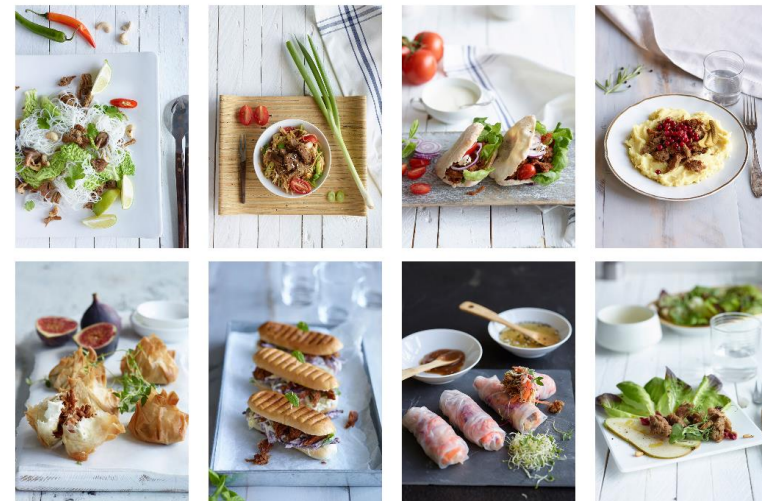

### PRODUCTS

1. Plant protein foods based on Nordic oats and beans

### SPECIALITY

Accolated Finnish start-up company producing complete plant protein, made ecologically with the Nordic oats & beans. Patented platform.

Taivalkosken Mylly is located in Southern Ostrobothnia, where farming and food industries have a long tradition. The location allows carefully to select raw materials to ensure they reach highest standards. Taivalkosken Mylly uses also the name West Mills Ltd. All products of Taivalkosken Mylly are produced mainly from Nordic grains that include also organic products and Nordic berries. The grains and berries are pure and natural without E-codes. We have certified ISO 9001:2008 (FIHSK96008A) quality control system and Ecocert natural for cosmetics.

Taivalkosken Mylly produces:

Extruded cereal and berry ingredients for industry, Breakfast cereals TalkMuru, TyrniMuru and Rölli for Finnish retailers. The nutritional content of TalkMuru has been rated the best in Finland.

Taivalkosken Mylly co-operates with local suppliers to provide cereal ingredients. Taivalkosken Mylly is the original production place of all the products. The mill has developed processes, where extruders operate as bioreactors resulting in improved water and oil retention, purity, taste and repetitive behaviour. The process improves also nutritional values in terms of protein, dietary fiber and oil content, when required. The products can include betaglucan and omega3, to which EFSA has supported health claims.

## PRODUCTS

OATrim is a weight management beverage made entirely of natural ingredients. It is a healthy snack that supports weight reduction and management, improves the wellbeing of your stomach.

OATrim is a Finnish innovation. We managed to combine exceptional ingredients with health benefits into a delicious drink that supports weight management, and is easy to consume. In addition to our own research and development, the product and its essential ingredients have been widely studied through clinical researches. OATrim is the first food product in Europe to utilize glucomannan's weight-reduction health claim substantiated by the European Union.

The weight management qualities of OATrim are based on glucomannan fibre found in the konjac plant. Glucomannan fibre causes a feeling of repletion when consumed together with water. It eliminates the feeling of hunger in a natural way, and works towards the body being accustomed to smaller portions.

OATrim beverages are oat-based and sweetened with a natural sweetener extracted from the stevia plant. Thanks to the premium ingredients, OATrim is naturally free of preservatives, dairy products, soy and gluten.

## PRODUCTS

1. Weight management beverages

## SPECIALITY

Finnish Innovation. First food product in Europe to utilize glucomannan's weight-reduction health claim substantiated by the European Union.

Bioferme Ltd is a family owned company set up in 1977. Our company develops, manufactures and markets a range of high quality plant-based food products and organic products for health-conscious consumers. Our main products are Yosa oat snacks and drinkable Yosa smoothies.

We source our ingredients from controlled farmers and producers only. We respect the natural taste and purity of each ingredient; that's why we use minimal processing. We also strive to full traceability of our food chain from "field to table". To meet changing consumer needs, we carry out intensive research in cooperation with Universities and research institutes. Our key R&D areas are probiotics and weight management.

In 1995 the birth of Yosa was a pioneer, being the world premiere for a product made by fermentation of oat, utilizing selected probiotic lactic acid and bifid bacteria. These days Yosa selection has even more grown. The ecological footprint set by Yosa can already be seen in numerous consumer refrigerators, as well as within many a food organization.

## PRODUCTS

1. A wide range of probiotic oat-based smoothies

The FINN CRISP brand was established in 1952, when FINN CRISP thin crisps were launched at the Helsinki Summer Olympic games.

Simple, pure and powerful FINN CRISP captures the essence of Finland for millions of people worldwide who care about eating healthily.

Finland has long traditions in crispbread consumption and crispbreads have been known in every household since the 1800's.

During the heyday of agrarian society, in the western part of Finland, it was traditional to bake bread only twice a year: in the autumn when the crops were new and in the spring, when the fresh water flowed freely in the streams and rivers after the winter. The crispy and nutritious bread was easy to store as it remained delicious for months.

**Finn Crisp is produced by Vaasan, part of the Lantmännen Unibake Group. Finn Crisp is being exported to over 40 countries around the world.**

## PRODUCTS

1. Rye bread and rye snacks; flavored rye snacks

## SPECIALITY

The Goodness of Nordic Nature. Products are thin&crispy. Baked with 100% wholegrain, rich in fibre and minerals, no additives, no fat added, no sugar added

All FINN CRISP communications should be based on FINN CRISP Original and its brand essence.

Vaasan Ltd is a Finnish bakery company that operates also in the Baltic countries. Our product range consists of bread and other bakery products. Our most known brands in Finland are Vaasan Ruispalat, Vaasan Taika and Vaasan Isopahto.

In Finland we have been baking since 1849 which makes us Finland's second oldest bakery. We have local bakeries in eight different locations around the country.

Following an acquisition in June 2015 we are now a **part of the international bakery group Lantmännen Unibake** which produces fresh and frozen bread products for the retail and food service sectors. Vaasan Oy specializes from now on in producing fresh bakery products while our bake-off business was integrated into the operations of our Finnish sister company Lantmännen Unibake Finland on 1st January, 2016. Our crisp bread offering became a part of Lantmännen Cerealia on 1st May, 2016 – a company focusing on grain-based food; flour, breakfast, pasta and ready-to-eat meals.

## PRODUCTS

1. Rye bread products, wholegrain breads, crispbreads; bakery products, cinnamon rolls, pastries, frozen pastries

## SPECIALITY

The oldest bakery in Finland.

The history of Pekan Leipä goes back to 1888 when Bakery Manelin was founded in Heinola, Southern Finland. Local baker Pekka Mussalo bought the bakery in 1964 and the name was changed to Pekan Leipä Oy. Nowadays Pekka's son Arto Mussalo runs the business.

Our breads and pastries are baked with traditional recipes with the twist of modern flavors. The quality, taste, healthiness and structure of the products are the main criterias guiding our product development.

Pekan Leipä Oy has been exporting organic bread to German market since 2003. The product became so popular that in the year 2008 a separate organic bakery was built in Heinola. In this modern IFS certificated bakery Pekan Leipä combines the traditional Finnish rye baking and the modern techniques.

## PRODUCTS

1. Rye breads mixed with oat and other grains, and other bakery products

## SPECIALITY

All ingredients are organic, lactose free and rich in fiber, and baked by using only traditional Finnish recipes

**FinnSnack (former Ruislandia) is a bakery that brings together healthy ingredients, great flavour and traditional baking techniques. Pure nordic taste, made with care in genuine brick-ovens.**

Generational legacy has reached its apex in our 18 meter long brick-ovens, which are further tuned to follow today's ecological requirements. Our ovens have the air-flow and humidity distinct to good brick-ovens, where the oven itself soaks in the moisture exhumed by the bread returning some of the moisture gradually back to the baking product during the process. Our products are baked or roasted twice in the oven – a unique baking process that guarantees crispy texture filled with flavour. For us, taste is everything.

We use only 100% Finnish ingredients. Mellow seabreeze and soft summer sun gives growth to the crops we use to give our products their deep, rich flavour.

Grown in fields far from pollution or traffic, with cold winters giving pests a hard a time, we can safely say our raw-materials are amongst the best and purest in the world. There are cheaper options available, but we want to use the best. And we hope, so do you.

## PRODUCTS

1. Rye snacks and baby snacks

## SPECIALITY

Rye snacks made from 100% Finnish ingredients using a unique baking process.

**Hartola**

The story began in a small home bakery on the Vuohela farm, which is almost 200 years old. Everything was changed when the founder of the company, managing director Pirkko Hämäläinen, was diagnosed with celiac disease. Pirkko was shocked when she discovered the extent to which gluten-free products lacked any taste. She decided to do something about it, beginning the development process of gluten-free products and focusing on the best raw materials, delicious recipes and the traditional baker's craft. "When you do something, make sure it's absolutely the very best it can be."

That was the beginning of a success story. Today, Vuohelan Herkku is one of the most beloved gluten-free brands in Finland. Our products go well with a broad range of diets.

Gluto fresh pasta is produced in Helsinki, with the purest Finnish water and Italian know-how and expertise. We believe that this dual identity and mix of cultures results in pasta that represents the best of both worlds. Finland, the country with uncompromising food safety standards, guarantees us a fresh and clean product. But since fresh and clean isn't enough, we lean on generations of Italian pasta traditions to serve you delicious flavours and scrumptious recipes.

Whether it is for your cosy home-made meals, your big family gatherings or your Italian theme dinners, with Gluto you only need one single pasta for all guests.

**At Gluto we believe that good food should not only taste good but also make you feel good.**

This is why we wanted our pasta to be easily digestible and to fit every diet. Gluto fresh pasta is not only gluten-free, but also free from dairy and eggs. On top of that, we have acquired some of the most important international dietary certifications which make Gluto fresh pasta suitable for every culture.

Boreal Plant Breeding Ltd. is a Finnish company specializing in the breeding of field crop varieties for professional farmers working in northern regions.

The main focus of our breeding programmes is on spring cereals, forage grasses and oil crops. We also have breeding programs for winter wheat, winter rye, pea and faba bean. The main emphases of our breeding programmes are yield potential, yield stability and quality. In quality breeding we aim to tailor the quality properties of our varieties to meet the needs of industrial end users.

In breeding for yield stability our main target traits are optimised maturity, disease resistance, lodging resistance, drought tolerance and winter hardiness.

### **PRODUCTS**

1. Field crop, spring cereals, forage grasses, oil crops
2. Winter wheat, winter rye, pea and faba bean

### **SPECIALITY**

Breeding of field crop varieties for professional farmers.

K-Maatalous Oy is part of the retailing conglomerate Kesko Corporation.

Our customers include agricultural entrepreneurs, machinery contractors, and equestrian professionals and enthusiasts. We offer better agricultural trade with expertise. From us, our customers get sustainable solutions that we provide with our local partners.

In the grain trade, we act as the farmer's sales channel. We find the best and optimum marketplace for the farmer's crop either in Finland or through export. Our cultivation contracts provide several different alternatives for marketing the crop.

The K-maatalous chain's supplier relationships are based on trust and a long-established developing cooperation. We purchase a large part of our products directly and cost-efficiently from suppliers without any intermediaries. Our aim is to offer products that best suit the demanding Finnish conditions and the best total service in the agricultural trade.

### **PRODUCTS**

1. Grain trade straight from farms to buyers in Finland and for export
2. Agricultural machinery

### **SPECIALITY**

They produce new knowledge and find efficient solutions for practical cultivation in co-operation with Finnish farms and researchers

Polar Oats Ltd is founded in 2007. The company is owned by number of family farms and the main business focuses on the international grain trade. The company's basic business idea is to combine the international grain trade without many of the middlemen with the Finnish eco-friendly grain which is having high quality and good traceability. The basis of the business idea is fast and cost-effective supply of containers directly from farms to foreign grain users around the world. Our main market is Europe. Delivered product is oats and barley to the food sector.

Finnish ethically cultivated grain with its technical and hygiene features is one of the best in the world. The grain growing in the northern long -day conditions produces a heavy crop with a good quality. The grain can be used in all kind of needs from the feed to baby food.

Raisio Feed Ltd and Raisio's grain trade unit combined into Raisioagro Ltd on 1 January 2012. Raisioagro is now a modern agritrader but still the same familiar and reliable partner as before. In addition to high-quality feeds and expertise in livestock feeding and crop farming, Raisioagro provides producers with a high-quality range of other inputs and farming supplies.

Raisioagro is a competent and reliable Finnish partner and a forerunner. We invest in quality and environmental sustainability. Our focus will remain on feeds, feeding expertise and crop farming. Other inputs and farming supplies complement our services.

Raisiagro has made feed mixes since 1948 and the company's market position in Finland is approximately 40% in farm feeds and over 50% in fish feeds. Fish and farm feeds are exported to Russia, the Baltic Countries and the CIS countries.

Raisioagro is the largest grain purchaser in Finland. Furthermore, we focus on international grain trade. We export milling grains, feed grains and malting barley through Finnish ports.

## **PRODUCTS**

**1. Feeds, crop farming, farming supplies, grains, oilseeds**

## **SPECIALITY**

**High quality and environmentally sustainable agricultural products.**
