Introduction To Shenzhen

Established in 1980, Shenzhen is the first Special Economic Zone in China. Adjacent to Hong Kong, it covers an area of 1,953 km² and has a population of 14 million. Over the past 30 years, Shenzhen has won worldwide recognition with its fast growth speed and has emerged from a small border town into an international metropolis and a miracle in the process of industrialization, urbanization and modernization in human history.

As the fourth largest economy by city in mainland China, Shenzhen enjoys per capita GDP of over USD 17,000. GDP per square kilometer hit USD

85.43 million, ranking the first among large and medium cities in China. The percentage of investment in research and development out of GDP amounted to 3.66%.

A modern industrial system featuring four pillar industries has been well in place in Shenzhen. The aggregate value of the city's high-tech industry, modern finance, logistics and culture industries accounts for over 60% of its GDP.

Established in 1980, Shenzhen is the first Special Economic Zone in China. Adjacent to Hong Kong, it covers an area of 1,953 km² and has a population of 14 million. Over the past 30 years, Shenzhen has won worldwide recognition with its fast growth speed and has emerged from a small border town into an international metropolis and a miracle in the process of industrialization, urbanization and modernization in human history.

As the fourth largest economy by city in mainland China, Shenzhen enjoys per capita GDP of over USD 17,000. GDP per square kilometer hit USD 85.43 million, ranking the first among large and medium cities in China. The percentage of investment in research and development out of GDP amounted to 3.66%.

A modern industrial system featuring four pillar industries has been well in place in Shenzhen. The aggregate value of the city's high-tech industry, modern finance, logistics and culture industries accounts for over 60% of its GDP.

Shenzhen is the high-tech hub of mainland China, featuring ICT, software, bio-science and new energy. The high-tech sector has become the most important industry of Shenzhen.

Shenzhen is also home to a raft of traditional industries with strong growth momentum such as garment, gold and jewelry, timepieces, furniture, mold, leather, art craft and gift, printing and toys. The products from these industries are marked by abundant variety, competitive price and good quality, and enjoy high market shares both at home and overseas.

Shenzhen is an important base for manufacturing and export trade in China, offering global clients diverse purchasing choices. Multinationals such as IBM, B&Q and Metro have set up procurement centers in Shenzhen.

Biotech, internet and new energy, three emerging industries of strategic dimension are fast becoming the bright spots in the local industrial landscape. In 2011, the total output value derived from these industries rose by 38.1%, thrice higher than the GDP growth rate.
