4  Evidence of non-tampering

5  Identification

# Plastic Seals – Indicative – Adjustable strap

WAY-LOK

Available colours 

Latest generation and high security seal. The metal insert is housed in a welded box to prevent tampering. Different versions to meet all needs. Ideal for closing mailbags and cash.

TEN-LOK

Available colours 

Multifunctional. It has a security box to house the insert and prevent unauthorized manipulation. Three sizes of brackets and different strip lengths of 2 mm diameter. Ideal for the meat sector, chemical containers, silos, aerial trolleys, emergency doors, ATM cassettes.

TEN-LOK 3.8

Available colours 

The longest on the market, 445 mm. length. Cylindrical strip of 3.8 mm. diameter. It has a security box to house the insert and prevent tampering. Diversity of colours. Ideal for tanks and silos.

	21 Combinations available: Short Flag (55x22mm) Long Flag (85x22mm) Strap 260 or 330mm Tear-off/Prongs/Hole/Stopper/Rfid
	Polypropylene  Tensile strength 36 kg  Logo, numbering and Barcode by Thermo-impresion, digital or laser.

	3 models available: TL1: Flag 54x22mm Strap:290mm TL2: Flag 54x22mm Strap:190mm TL7: Flag 68x22mm Strap:290mm
	Polypropylene T. S: 15-36 kg Nylon. T.S: 22-26kg  Logo, numbering and Barcode by Thermo-impresion, digital or laser.

	Flag 54 x 22 mm. marking area: 31 x 18 mm Strap: 285 or 445 mm
	Polypropylene  Tensile strength 31-39 kg  Logo, numbering and Barcode by Thermo-impresion, digital or laser.

# Plastic Seals – Indicative – Adjustable strap

## TEN-LOK 7 RFID

Available colours 

Multifunctional. It has a security box to house the insert and Flag with Rfid tag and different strip lengths of 2 mm diameter. Ideal for the meat sector, chemical containers, silos, aerial trolleys, emergency doors, ATM cassettes.

## TEN-LOK 1 Detectable

Available colours 

In addition to the same specs as TEN-LOK, this version has a metallic pigment that is detected by metal detectors. Usually used in Food and Pharmaceutical Industries. Suitable for food contact.

## SECURE TITE

Available colours 

One-piece seal. Wide variety of shapes, sizes, colors and versions (skewers, tear-off, large bracket, label holder) Ideal for identifying and closing bags

Flag 22 x 68 mm.  
marking area: 20 x 60 mm  
Strap: 290 x2 mm

Tensile strength 21 kg

Polypropylene or Nylon.

Logo, numbering and  
Barcode by Thermo-impresion,  
digital or laser.

Flag 22 x 54 mm.  
marking area: 20 x 60 mm  
Strap: 290 x2 mm

Tensile strength 21 kg

Polypropylene or Nylon.

Logo, numbering and  
Barcode by Thermo-impresion,  
digital or laser.

Flag 22 x 68 mm.  
marking area: 20 x 60 mm  
Strap: 290 x2 mm

Tensile strength 21 kg

Polypropylene or Nylon.

Logo, numbering and  
Barcode by Thermo-impresion,  
digital or laser.

# Plastic Seals – Indicative – Fixed length

## PULL TITE

Available colours 

Multifunctional. It has a security box to house the insert and prevent unauthorized manipulation. Card with RFID tag and 2 mm diameter strip. Ideal for the meat sector, chemical containers, silos, aerial trolleys, emergency doors, ATM cassettes.

## PULL FLY

Available colours 

Indicative seal designed for easy application. 1.8mm diameter. It is ideal for sealing small holes in meters and fire extinguishers.

## BI-LOK

Available colours 

High security seal with two different closure forms, in the form of a loop or longitudinally separating the body from the bracket, Strip of 120 and 215 mm. long and 1.6 mm. diameter. Ideal in Metrology for sealing water or electricity meters and for the airline sector.

Flag: 39x22 mm  
Marking area: 17x22 mm  
Straps available: 150 mm, 240 mm and 300 mm

Polypropylene

Tensile strength 4-6 kg

Logo, numbering and Barcode by Thermo-impresion, digital or laser.

Flag: 24x12 mm  
Straps available: 150 mm  
Diameter: 1,8 mm

Polypropylene T. S: 4.8 kg  
Nylon. T.S: 6-8 kg

Logo, numbering and Barcode by Ink, Thermo-impresion, digital or laser.

Flag: 24x12 mm  
Straps available: 210 mm  
Diameter: 1,6 mm

Nylon

Tensile strength 4-6 kg

Logo, numbering and Barcode by Thermo-impresion, digital or laser.

# Plastic Seals – Indicative – Fixed length

## NEW-LOK

Available colours 

Multifunctional and economical. One-piece seal with different versions (pins, tear-off, label holder). Diversity of colors. Ideal for the identification and sealing of bags.

## PULL GRIP 4

Available colours 

Multifunctional and versatile application. Economic. Easy opening thanks to its tearable

## WITTY-LOK

Available colours 

One-piece seal, RING type. With break point for easy opening. Ideal for securing the closure of containers, wagons and trucks. Applicable for TIR cable

	<p>Flag: 53x22 mm Marking area: 50x20 mm Strap: 360x6 mm</p>
	<p>Polypropylene</p> <p>Tensile strength: 22Kg</p> <p>Logo, numbering and Barcode by Thermo or Digital impresión.</p>

	<p>Flag: 30 x 21,9 mm Marking area: 30 x 15 mm Strap: 196 x 3,6 mm</p>
	<p>Polypropylene</p> <p>Tensile strength 13-16 kg</p> <p>Logo, numbering and Barcode by Thermo-impresion, digital or laser.</p>

	<p>Flag: 42mm Marking area: 20x60mm Strap: 290mm</p>
	<p>Polypropylene.</p> <p>Tensile strength: 22Kg</p> <p>Logo, numbering and Barcode by Thermo or Digital impresión.</p>

# Plastic Seals – Indicative – Padlok closure

## HAND-LOK

Available colours

Multifunctional PADLOCK type seal. Ideal for sealing openings or small holes such as catering and beverage cabinets for airplanes, electricity meters, water, gas, drums, and especially indicated in the meat sector for sealing livers and viscera.

	Flag: 30x20 mm Marking area: 28x16 mm
	Polypropylene  Tensile strength: 2,8 Kg  Logo, numbering and Barcode by Ink, Laser, Thermo or Digital impresión.

## SECUR HASP I

Available colours

PADLOCK-type seal with manual closure and in different versions. Ideal for catering cabinets, metal drums, tire cable, refrigerated trucks, transport in general and for closing cabinets and keeping keys or gates.

	Body 37x25mm Wire: 1,5 mm
	Polypropylene and galvanised Steel  Tensile strength: 3,8 Kg  Logo, B/C and numbering by laser or Thermo.

# Plastic Seals – Indicative – With twist lock and wire

## EURO TOOLESS AND TOOLESS DOUBLE FLAG

Available colours 

Family of ROTATING CLOSURE seals, ideal for sealing small diameter holes such as metrological meters (water, gas, electricity, taximeters...). It does not require pliers for its application. We have a special resin version for fuel pumps and meters.

## WIRE

Tensil Strength:

Stainless Steel (Coated) —  
15 - 19kg  
0.82mm  
Stainless Steel (Non-coated) —  
13 -17kg

## BUTTON SEAL

Plastic button that replaces lead for sealing meters and scales for both energy and water production companies and meter manufacturers or installers.

It is applied with corrugated wire and special pliers.

Both the button, made of polystyrene, and the wire are self-extinguishing.

EURO TOOL LESS  
Flag: 27 x 10,5 mm  
TOOL LESS DOUBLE FLAG  
Flag: 16 x 5 mm.

Body Polyester/ Insert ABS  
Or  
Body Resin/ Insert Resin

Logo, numbering, B/C, DIBI by  
laser

Diameter: 10 mm  
Min. order: 10,000 units

Material: Self-extinguishing  
polystyrene  
Option of marking using the  
press

6 Digits max. to be marked

# Other Plastic Seals

## BOX SEAL

Anchor seal in one piece. With break point for easy opening. Ideal to ensure the closure of crocodile boxes.

## FISH

Anchor seal in one piece. With break point for easy opening. Ideal to ensure the closure of drums for liquids, drums, steel drums, fiber drums 20-2001.

## TREE

Available colours 

Anchor seal in one piece. With break point for easy opening. Ideal to ensure the closure of drums for liquids, fiber drums, steel drums, steel barrels 60-400l

Flag: 35\*11,7 mm  
Anchor: 19,7\*9 mm

Polypropylen  
Laser or mould engraved  
Min. order: 10,000 units

4 mm hole diameter for  
attaching label

HOSTALEN Polypropylen  
Logo optional.  
Min. order: 10,000 units

15 mm hole diameter  
for attaching label

Polypropylene copolymer  
Logo optional.  
Min. order: 8,000 units

# Other Plastic Seals

## HANGERS

---

Usually used in the Food Industry as a Ham hanger in the drying process. Resistant to weight and temperature changes. Reusable. White color. Ideal for hanging on a hanger or hook.

	Nylon
	No marking

## PLASTIC FLANGE

---

One-piece seal, RING type. With break point for easy opening. Ideal for securing the closure of containers, wagons and trucks. Two versions of maximum security closure

	Polypropileno
	No marking

# Metallic Seals – High Security Barrier

## CLIK-LOK 2

Available colours 

Semi-barrier metal seal specially designed for T.I.R transport and container traffic. It is the standard customs seal. With optical indication of the correct closure. It requires a tool to open it. Ideal for sea containers.

## F-150

Available colours 

ADJUSTABLE FLANGE type cable seal. Standard cable 1.5 mm in diameter and 25 cm long. It requires shears to break it. Ideal for valves, transport, land and air and tanks.

## F-350-F-500

Available colours 

High security ADJUSTABLE FLANGE type cable seals with 3.5 mm and 5 mm diameter braided cable. It requires shears for its opening. Widely used in the transport and logistics sector. Ideal for trucks, tanks, sea and air containers, railway cars, all types of valves and drums.

Shaft diameter: 7,9 mm  
Total shaft length: 84,1 mm  
Head diameter: 24,2 mm

Carbon steel inner shaft and high impact polystyrene cap. ABS coating.  
Tensile strength: 1,800 kg.  
Numbering, B/C, in laser

Body: 26\*22mm  
Cable diameter: 1,5 mm  
Length: 250 mm

Aluminium body and non-preformed braided steel cable.  
Tensile strength 330 kg  
Numbering, company name, B/C, in laser

F-350: Body 26 x 26 mm. Cable: Diameter: 3.5 mm/ length: 300 mm  
F-500: Body 38 x 30 mm. Cable: Diameter: 5 mm/ length: 300 mm

Aluminium body and non-preformed braided steel cable.  
F-350: Tensile strength 1,326 kg  
F-500: Tensile strength 1,500 kg  
Numbering, company name, B/C, in laser

# Metallic Seals

## SHIPPING-LOK

Available colours

Metal ring type security seal with flat strip made of reinforced metal designed for sealing trucks and transport vehicles, containers, etc. It is the standard customs seal. With optical indication of the correct closure. It requires a tool to open it.

## HARBOR-LOK RFID

Available colours

The seal has a tamper alarm or manipulation alarm system. It consists of a mechanism that is activated when the cable is broken, automatically altering a check digit of the tag.

When reading the seal with the RFID system, it informs if it has been tampered with.

## MARVIK

Available colours

INDICATIVE clip-type aluminium seal, specially designed for machines, cabinets and fire extinguishers. It can be applied with metal wire or rope.

	Flag: 80*20 mm Perimeter Closure 200 mm Strip measures: 9x 200 mm
	Flag: Polypropylene. Strip: Tin-plated metal Locking Mechanism: Stainless steel Tensile Strength: 70 Kg  Logo, num, B/C by Laser

	Aluminum plastic and braided steel cable.
	Minimum tensile strength of 30kg Guaranteed reading distance of 6m  Laser marked

	Large side: 17 mm, small side: 15 mm Length (closed): 20mm
	Aluminium.  Text/logo, numbering by Laser

# Security Labels

- » Personalized labels that evidence unauthorized manipulation by revealing a hidden message.
- » Different materials in its manufacture ensure perfect suitability for application on different surfaces.
- » Wide range of colors and sizes. Possibility of customization.
- » Essential for the airline industry, hospitality, hospitals, police, offices, transport, trucks, computers, safes, telephones and in any other application where, in an economical way, evidence of unauthorized manipulation is required.
- » For porous surfaces such as cardboard, we have continuous security rolls for closing boxes or large surfaces.
