Digital Transformation in Smart Manufacturing

Advantech Israel invites you to take part in the Webinar "[The Next-Level Optimization: Factory Facility Management](#)", which will be held on [August 23 at 11 AM](#) (Israel Time).

Factory Intelligence and Smart Manufacturing are the keys for the manufacturing industry to maximize efficiency. Especially, challenges such as difficult assets, equipment management, and ineffective utility are rather critical issues.

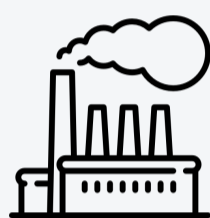

At this webinar, our experts will present the solutions and application stories in how the technology assists electronic equipment manufacturers to achieve maximum efficiency management.

Join us to discuss with thought leaders in the field!

Difficult Assets & Equipment Management

- Reduce equipment downtime
- Improve OEE statistics
- Enhance local alarm system

Inefficient Utility Management

- Reduce water / gas / power consumption by real-time monitoring
- Enhance alarm and notification system

Ineffective Process Control

- Reduce costs by optimizing production process
- Provide comprehensive monitoring
- Plan corrective maintenance

Restricted to On-site Inspection

- Reduce on-site visits by monitoring remotely
- Save working time by using dashboard for data visualization
- Set up a utility benchmarking plan

In the program of the webinar:

- Challenges and Success Cases for Factory Facility Management
- Features and Benefits of Automation and Remote Facility Management Solutions
- Technical Implementation and Application of Node-RED
- Wireless & Communications Solutions for Factory Management Sector
- Real-time Data Monitoring Solution for Factory Intelligence and Smart Manufacturing

Register Now For FREE!

- The certificate will be offered to the attendee staying to the end!
- Chance to win Amazon Voucher
- Lucky Draw for AI Development Kit & Testing Sample

* Advantech reserves the right to change, revise, and explain the specifications and event
