# Smart Retail

A professional summit showcasing cutting-edge technologies and solutions in the retail sector. The exhibition primarily focuses on presenting new technologies and relevant solutions. Shopping centers should be able to operate in an eco-friendly manner, benefiting both capital, consumers, and merchants. Additionally, a concurrent Smart Display Business Opportunities Forum will be held, providing an in-depth discussion on the latest industry trends and insights from guests.

Imaging Applications

Secutech 2024 will showcase numerous applications of monitoring imagery and AI this year. Secutech 2024 allows you to purchase high-quality surveillance products also enables you to customize your own surveillance solutions to adopt your own business.
From cameras to off-shore system platforms, you can find you new partner here.

AI-EMPOWERED

Intelligent Monitor, Gate Control, Security Solutions, AI Applications, 5G Technology Application. Elevate your systems.

TRUSTWORTHY PARTNER

Both the products and solutions comply with the National Defense Authorization Act (NDAA) legislation.

APPLICABLE TO VARIOUS FIELDS

A customized solution can meet your needs in different applications such as shopping malls, factories, parking areas, schools, restaurants, etc.

CUSTOMIZED SOLUTIONS

From surveillance systems to object detection and analysis, you can find your needs fulfilled at Secutech 2024.

Disaster Prevention

Taiwanese manufacturers excel in disaster prevention through the application of information and communication technology, particularly in earthquake detection. Integration with ICT devices enhances early warning systems, ensuring swift and reliable communication during disasters.

DISASTER PREVENTION & RESCUE EQUIPMENT
Disaster Prevention Technology, Emergency Communication, Relief Supplies, Rescue Equipment, Fire & Rescue Vehicle

FIRE ALARM & FIRE EXTINGUISHING SYSTEM
Automatic Watering System, Fire Detector, Ventilation and Smoke Exhaust Equipment, Emergency Public Address, Escape & Emergency Equipment

SPECIAL FIRE EXTINGUISHING EQUIPMENT
Fire Blanket, High-Pressure Nozzle Water Column System, Special Hazard Suppression Systems, Water Mist System, Infrared Thermal Imaging Camera, Fire Detection System, Back-draft Ventilation System

INTEGRATION WITH ICT
With Taiwanese companies applying IoT in disaster relief, the current state of disaster response is better controlled, enhancing the capabilities for disaster relief.

Industrial Safety

The growing awareness of industrial safety in Taiwan, actively promoted by the government, aligns with the expertise of Taiwanese companies in critical areas. These include gas detection, electrical explosion-proof devices, and personal protective equipment.

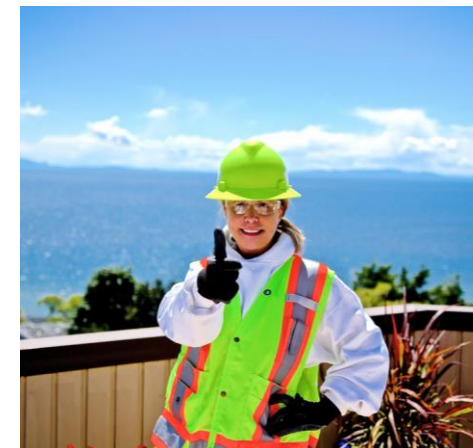

GAS DETECTION

Monitor and detection gas concentrations, combine IoT devices to promptly control on-site conditions.

ELECTRICAL EXPLOSION-PROOF DEVICES

High-quality electrical explosion-proof equipment, coupled with comprehensive design solutions, can help prevent industrial accidents and enhance factory safety.

PERSONAL PROTECTIVE EQUIPMENT

A comprehensive supplier of personal protective accessories helps you find suitable gear to ensure the safety of workers.

Taiwan surveillance, Security, Fire & Safety Industry

The future trends in the surveillance industry are moving towards the application of AI, increased interoperability across multiple devices, and the adoption of open platforms. Simultaneously, with the growing utilization and significance of mobile devises, information security and compliance with regulations are also significant focal points within the industry.

Therefore, Taiwan is poised to have a significant advantage in the future of the security sector. Unlike past considerations such as cost-effectiveness, Taiwan's strengths in the ICT industry can facilitate seamless communication among IoT devices. Also Taiwanese firms have already started integrating AI into solutions, enabling these solutions to adapt to various industry environments and settings.

IcT Technology

Taiwan's ICT technology is a global leader in semiconductor manufacturing, hardware production, and innovation-driven R&D. Specializing in networking, cloud computing, and software development, it is a key player in the international technology arena. Fueled by a dynamic start-up ecosystem and government support, Taiwan continues to make significant contributions to emerging fields such as AI and IoT, solidifying its position as a major force in the rapidly evolving global tech landscape.

Cyber Security

Nowadays everything is integrated into the Cloud, the crucial aspects of privacy and data protection can't be overlooked. Taiwanese manufacturers offer solutions that not only leverage AIoT capabilities but also prioritize data security. These solutions are adaptable, allowing customization to align with various regulations such as NDAA compliance and more.

MAIN MANUFACTURERS

Meet Taiwanese Manufacturers

Taiwanese manufacturers are introducing advanced solutions in AIoT and smart security, precisely designed to meet the diverse needs of various industries and prioritize product quality, stability, and durability.

SECURITY

3S System Technology, ACTi Corporation, Avtech, Delta Electronics, HUNT Electronic, GKB, YODA Communications, MERIT LI-LIN, HI SHARP Electronics, Vacron, VIVOTEK, Deeplet Technology Corp....

FIRE & SAFETY

AVA-Prevent, HORING LIH Industrial, SO CHIAO Industry Corporation, Safe Fire Protection Equipment, TAICHUNG Extinguishing Enterprise ...

INDUSTRY SAFETY

DOFAIR, SHENG YI TECH & Analytics, WAN JIUN Technology, INTERKING Enterprise...
