**Products that meet people's hygiene needs
yet respect the skin's neutral pH.**

hygiene

soapy sponges and soapy wash mitts

CV Médica manufactures two types of sponges: polyester fibre and foam sponges, both impregnated with dry neutral pH5.5 soap. The main difference is in the touch. Fibre sponges are more effective at removing dirt and impurities, while foam rubber sponges are softer and release soap more slowly. The foam rubber sponges are recommend for sensitive skin.

instructions of use

Take a sponge and moisten slightly. Press repeatedly until foam appears. Soap up and rinse with water. It is not recommended to dip the sponge in water as it loses effectiveness.

soapy fibre sponges

Dispobaño

Weight: 100g/m²
Size: 20x12cm
Basic support for efficient hygiene.

**Products that provide the necessary functionality,
with maximum efficiency for the healthcare
professional and maximum comfort for the user.**

nursing care

Immobilisers and slings

Products to hold body limbs as therapy or to protect patients with maximum comfort and adaptability.

Include adjustable straps with velcro closures for ideal positioning and holding.

Assortment:

- **Arm and shoulder immobiliser:** Safely holds the arm to the body with an adjustable thoracic strap. The generous forearm bag size supports the wrist and includes a thumb strap to maximise comfort. Can be used as a sling.
- **Sling:** Supports a patient's arm when cracked or with minor injuries in the recovery phase.
- **Clavicle immobiliser:** Holds the shoulder in a correct position to recover from an injured clavicle.
- **Limb holder:** For agitated patients at risk of disrupting treatment or causing self-injury, or compromising wound site integrity. Anatomical design, adaptable for wrists and ankles, includes a fastening system to adjust the holder to the limb with straps to be knotted to the bed.

1070806	T6 97/110 cm	1	10	Box

* Waist circumference.

Catheter Holder

The probe holder is suitable for practical and efficient attachment of the probes and catheters to the limbs.

Highlight

Practic and easy to use.

Ref.	Pcs./pack	Pcs./box	Type
1070570	1	30	Box

Applications

Telemetry Monitor Holder

Suitable for the transport of telemetry and monitor devices. Practical and comfortable system. Standard measurements. Made of Polyamide (PA) fabric.

Highlight
Prevent cross contamination.

Ref.	Features	Pcs./pack	Pcs./box	Type
1070610	With internal protection	1	25	Box
1070600	Standard	1	25	Box

Applications

Extra Support Vest

Made of light, breathable and very resistant Polyester (PES) fabric.

Highlight
Reinforced seams and four straps for versatile attachment of the patient to the framework.

Ref.	Size	Pcs./pack	Pcs./box	Type
1015510	Large	1	10	Box
1015500	Medium	1	10	Box

Applications

Normal Support Vest

Made of light, breathable and very resistant Polyester (PES) fabric.

Highlight
Efficient and safe fastening.

Ref.	Size	Pcs./pack	Pcs./box	Type
1015670	Large	1	10	Box
1015660	Medium	1	10	Box
1015650	Small	1	10	Box

Applications

Perineal Fastening Belt

The support belt is designed as an alternative to the traditional support vest for patients in chair-type structures. Made in very breathable Polyamide (PA) mesh.

Highlight
Perineal belt for perfect support in chair.

Ref.	Pcs./pack	Pcs./box	Type
1070200	1	12	Box

Applications

Abdominal Support Belt

The support belt is designed as an alternative to the traditional patient support vest in bed- or chair-type structures to prevent possible falls or slips. Device intended exclusively for abdominal positioning. Do not apply to any other part of the body.

Highlight
Made of Polyether foam cover with soft Polyamide (PA) fabric.

Ref.	Size*	Pcs./pack	Pcs./box	Type
1070150	Large 115x17 cm	1	12	Box
1070100	Medium 70x17 cm	1	12	Box

Applications

Abdominal Girdle

The abdominal girdle is designed to hold the abdominal area firmly after surgery. **It's not an elastic girdle.**

Highlight
Post-surgery abdominal support.

Ref.	Size*	Pcs./pack	Pcs./box	Type
1070310	Large 150x30cm	1	10	Box
1070300	Medium 130x30cm	1	10	Box
1070305	Small 130x25cm	1	10	Box

Applications

Fastening Strap

To secure patient to the operating table. This device is designed for the trunk or abdominal area. Not recommended on any other part of the body. Used to keep a patient in a static position to avoid sudden movements during the operation.

Highlight
Patient operating table fastening strap.

Ref.	Size*	Pcs./pack	Pcs./box	Type
1070500	Arm/Leg 8x80 cm	1	20	Box
1070550	Surgical table 6x150 cm	1	20	Box
1070560	Surgical table 6x230 cm	1	20	Box

Applications

Moldable Supports

Indicated to immobilize and protect the puncture sites of patients, used in resuscitation, emergencies, ICU, ...

It holds the intra-venous and intra-arterial therapy elements to the patient's limb, thus preventing any sudden movement from moving or pulling them out.

Device not suitable for agitated or aggressive patients or for patients with trauma in the area to be supported.

Highlight
Inner support in moldable Aluminium to secure puncture sites.

Ref.	Size*	Pcs./pack	Pcs./box	Type
1060100	Extra Small	1	30	Box
1060120	Small	1	30	Box
1060125	Medium	1	30	Box
1060130	Large	1	30	Box

Applications

anti-bedsore

Protective elements to avoid the appearance of bedsores on patients who have to endure long periods of immobilisation or patients with reduced mobility. The silicone polyester fibre filler enables immediate recovery and reaction to any pressure applied for optimal weight distribution.

Anti-bedsore Mattress

The mattress is used to prevent bedsores on patients who have to stay in a bed or on an operating table for a long time.

In addition, the cushion can be placed in a waterproof cover to prevent it from being damaged by liquid spills.

Size: 200x84cm.

Highlight

Made of cotton and siliconized polyester (PET) fibre lining. Comfortable and breathable.

Ref.	Features	Pcs./pack	Pcs./box	Type
5022105	Cotton dotted mattress		1	Bag
5022107	Cotton tubular mattress	1	1	Bag
5022205	Waterproof breathable cover	1	1	Bag

Applications

Dotted Anti-bedsore Pillow

The dotted pillow is a medical device used to prevent bedsores on patients who have to stay in a chair for a long time.

In addition, the cushion can be placed in a waterproof cover to prevent it from being damaged by liquid spills.

Size: 48x48cm

Highlight

Made of cotton and silicone polyester (PET) fibre lining. Comfortable and breathable.

Ref.	Features	Pcs./pack	Pcs./box	Type
5020100	48x48cm	1	1	Bag
5020200	Waterproof breathable cover	1	1	Bag

Applications

Anti-bedsore Pillow

A pillow covered in synthetic fur to prevent bedsores on patients who must remain sitting for long periods of time.

Available in different shapes to adjust to the patient's needs or the type of chair.

Highlight

Made of cotton and silicone polyester (PET) fibre lining. Comfortable and breathable.

Ref.	Features	Pcs./pack	Pcs./box	Type
5010000	Square cushion (44x44 cm)	1	1	Bag
5010002	Dotted square cushion (44x44 cm)	1	1	Bag
5010003	Ring cushion (Ø 49 cm)	1	1	Bag
5010001	Horseshoe cushion (44x44 cm)	1	1	Bag

Applications

Elbow Heel Protector

To prevent bedsores on the elbows or heels of patients who have to stay in bed or chair for a long time. It can also be used as a wound dressing as it is attached as a bandage, providing great comfort because it is easy to open and close after curing.

Very effective product to protect the joint because the inner reinforcement diffuses and distributes the pressure.

Comfort Elbow Heel Protector

Material: top outer in Polyamide (PA) non woven fabric with inner padding in polyether foam and down outer in cotton.

Highlight
More comfortable.

Ref.	Pcs./pack	Pcs./box	Type
1000610	1	60	Box

Applications

Feet-heel Protector

Material: Outer of polyamide (PA) non woven Fabric, lining in Polyethylene (PET) fibre.

Highlight
Heel protection and bony prominences of the foot.

Ref.	Pcs./pack	Pcs./box	Type
1080250	1	20	Box

Applications

Standard Heel Elbow Protector

Material: Outer of polyamide (PA) non woven Fabric, lining in Polyethylene (PET) fibre.

Highlight
Basic protection, reinforced as option.

Ref.	Features	Pcs./pack	Pcs./box	Type
1080200	Standard	1	36	Box
1080210	Reinforced	1	36	Box

Applications

Open Elbow Heel Protector

Material: inner of polyamide (PA) non woven Fabric, lining in Polyethylene (PET) fibre and outer in Polyether fabric.

Highlight
Open protector for better breathability.

Ref.	Size	Pcs./pack	Pcs./box	Type
1080290	Short 23x28 cm	1	40	Box
1080280	Long 23x43 cm	1	20	Box

Applications

protection

Elements that provide hygiene and comfort for certain hospital procedures.

Confort Braun Splint Coating

The coating is used to cushion the Braun splint to prevent bony prominences from causing a pressure ulcer.
Material: padding in Polyester foam.

Highlight

More comfortable.

Ref.	Size	Pcs./pack	Pcs./box	Type

Applications

Braun Splint Protection

The coating is used to cushion the Braun splint to prevent bony prominences from causing a pressure ulcer.
Material: padding in Polyester PET fibre.

Highlight

More Breathable.

Ref.	Size	Pcs./pack	Pcs./box	Type
1040310	Large 105×54 cm	12	12	Box
1040305	Medium 95×54 cm	12	12	Box
1040300	Small 85×54 cm	12	12	Box

Applications

Surgical Table Cover

The purpose is to provide patients with the greatest of comfort during any operation or surgical procedure. Another use is to absorb the patient's blood or body fluids.

To clean the operating table or the patient better.

Highlight

Provides comfort and fluid absorption.

Ref.	Size	Pcs./pack	Pcs./box	Type
1040920	Large 180×61 cm	1	10	Box
1040910	Medium 98×61 cm	1	10	Box
1040900	Small 21×61 cm	1	30	Box

Applications

therapies

Elements developed to protect or be used in medical-health therapies or interventions. Developed with the most suitable materials to offer effective functionality and patient comfort.

Eye Protector

Eye protection for phototherapy to prevent potential damage from phototherapy in paediatric and newborn patients.

Highlight

Adjustable in head circumference and height.

Applications

Ref.	Features	Pcs./pack	Pcs./box	Type

1029250*	Small 28-35cm	1	25	Box
1029200*	Medium 36-40cm	1	25	Box

*With rear protection.

Bag for Ice

To remain for extended periods of time on the area to be treated with cold therapy. More beneficial and comfortable for patients.

The longer duration of the ice inside the bag and the reduced frequency of ice replacement help optimize nursing staff time.

The four fastening straps make it easy to attach the bag to the treatment area.

Highlight

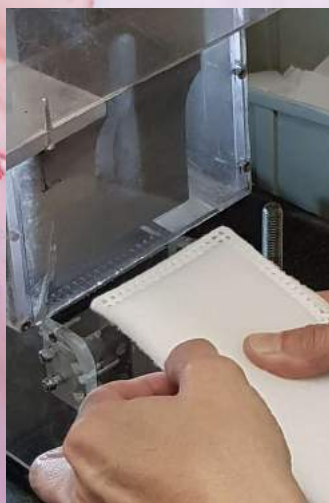

Soft, highly resistant and easy to apply.

Ref.	Features	Pcs./pack	Pcs./box	Type
1031610	28x9 cm	1	30	Box
1031700	28x13 cm	1	10	Box

Applications

* As manufacturers, we can develop custom products and/or with your own brand. Please contact our sales department.

CV Médica works with doctors and other healthcare professionals to develop comfortable products for users that are efficient for healthcare professionals and highly functional.

Our production process allows us to be flexible to adapt our products to their requirements/needs.

We develop:

- Original equipment for other brands (OEM).
- Changes to material specifications based on functionalities.
- In accordance with any required dimensional adaptations.

We encourage you to contact us.

**Disposable products with high demand suitable
in healthcare sector but also in other industries.**

medical devices

syringes

Disposable syringes made of non-toxic and non-pyrogenic polypropylene are non-bacterial, after ethylene oxide sterilization. Easy to use, comprised of a body, piston and sealing gasket, all material is latex-free, PVC and phthalate free.
