Panelsan Çatı ve Cephe Sistemleri Sanayi ve Ticaret A.Ş. was established by young entrepreneurs with the awareness of importance in construction sector in Turkey in Ankara Polatlı Organized Industrial Zone. Manufacturing plant is located on closed area of 18.000 m² on the total area of 40.000 m².

Starting to manufacture Mineral Wool (Rockwool-Glasswool) and Expanded Polystyrene (EPS) insulated sandwich panel in 2004, Panelsan analyzed that the need for sandwich panel and EPS products as a result of awareness-increasing among constructional sector and investors about insulation in the changing and developing geography and commissioned manufacturing line of EPS insulation boards and injection packaging products in 2005.

By 2010s, increased market share thanks to its provision of 'reliability' in the sector, RE-DE investments, importance given to institutionalization and total quality management and steps taken for branding keep Panelsan subject to decision-making process for new investments.

By 2014, supporting its works and investments with Kaizen and 5S and creating high quality, safe, economic, esthetic and comfortable areas of living, Panelsan fed the reliability relation established with the customers and commissioned the line of Polyurethane (PUR) and Polyisocyanurate (PIR) insulated sandwich panel. Panelsan A.Ş. has become the first plant to have product and profile range which can respond to all the needs such as heat insulation, air impermeability, hygiene, perspiration, reliability, safety, aesthetics, fire insulation and etc. in Turkey thanks to its of Polyurethane and Polyisocyanurate, Rockwool, Glasswool and Expanded Polystyrene insulated sandwich panels and EPS insulated products.

F50 Classic Capped Facade System

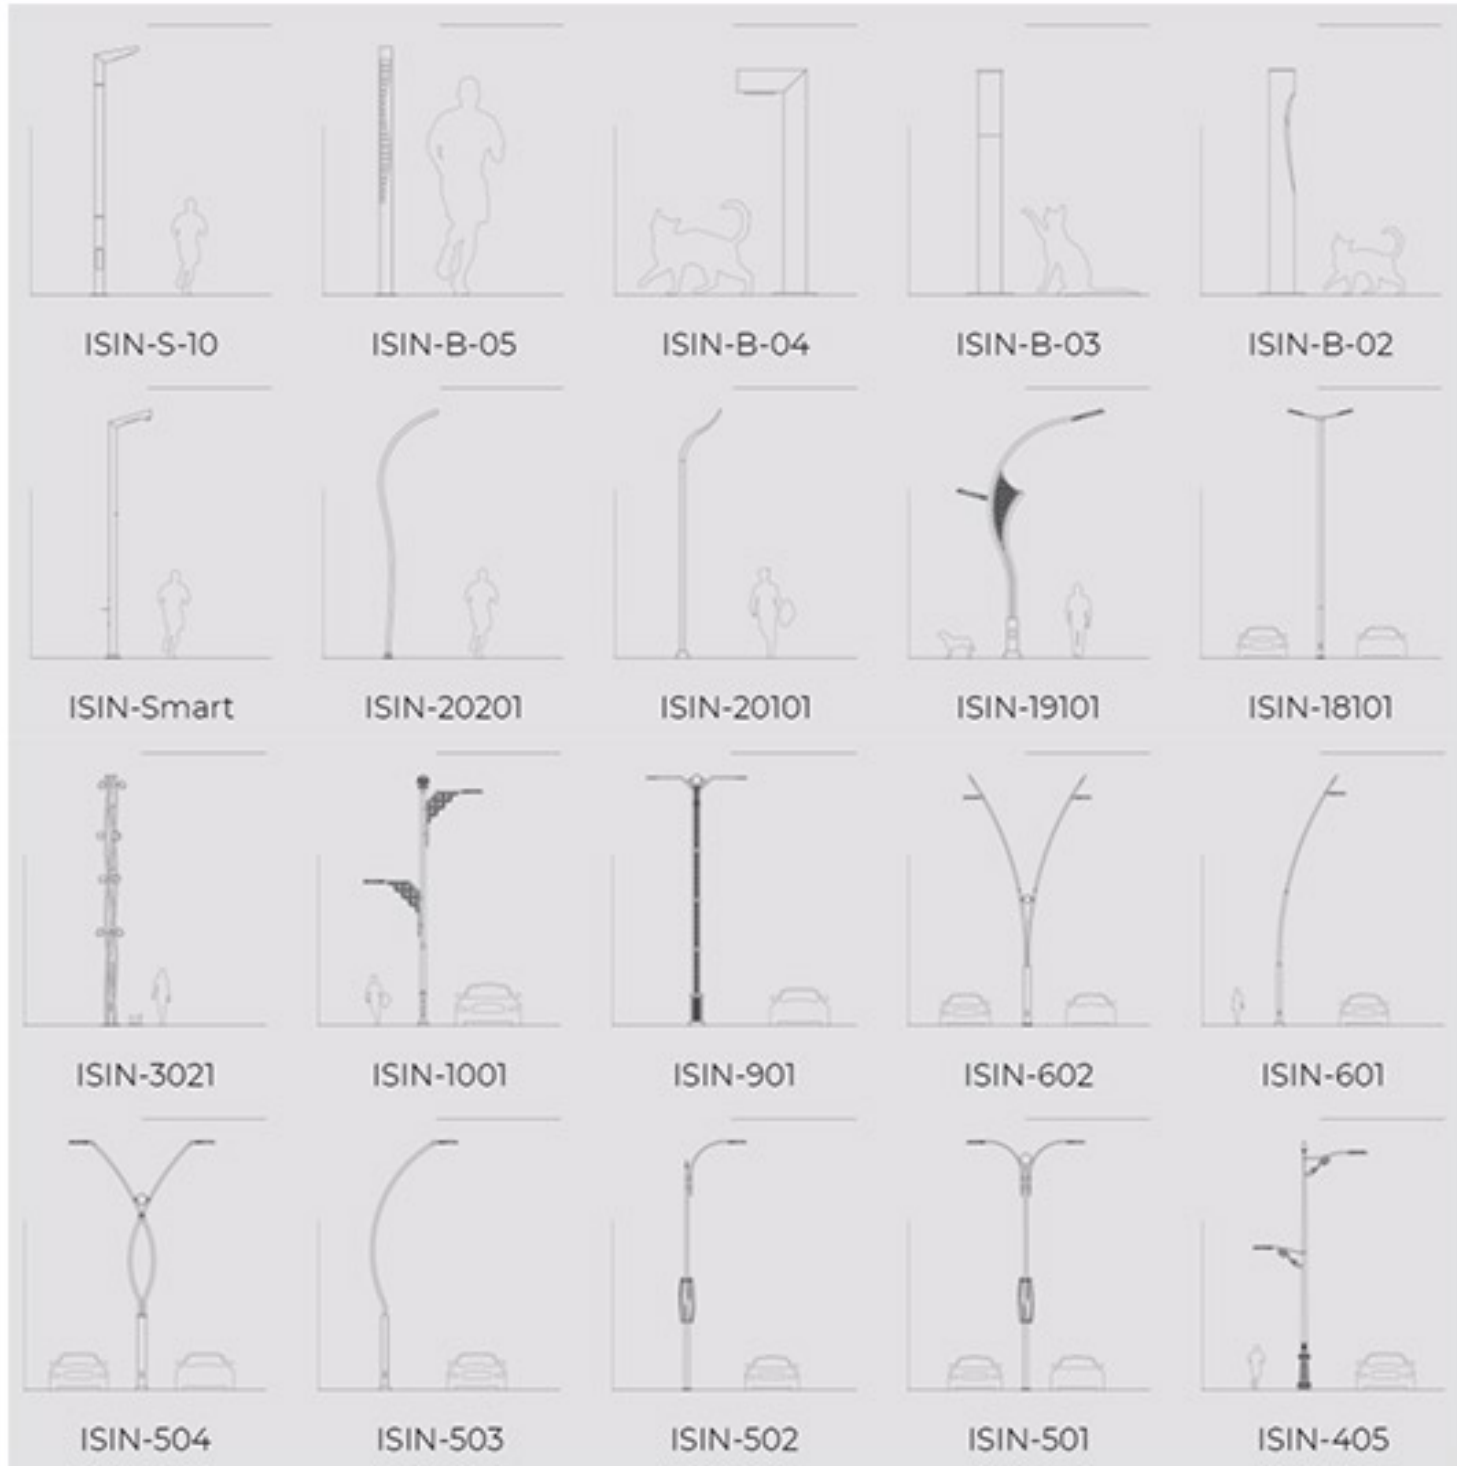

Founded in 2003 in Ankara, Işın Manufacturing, Lighting, Logistics, Food Ltd. Co. has become one of the leading brands of the sector by growing in a short time with its dynamic structure. The company, which has been operating with unconditional customer satisfaction principle since its establishment, has demonstrated that it deserves this satisfaction and trust with the unlimited effort that it shows in the production phase and after sales services.

Although the main items of the product portfolio are lighting poles with polygonal and circular cross section, projector poles with protected stairs and portable ladders, projector poles with standard elevators and human elevators, stadium lighting poles, flagpoles with external and internal rope, elevated flagpoles, overhead pole posts, GSM poles, poles for city surveillance cameras, lightning rods, loudspeaker, camera poles, advertising columns any kind of special projects and production can also be realized depending on customer's demand.

In line with the increase in demand for decorative poles, the company established Bofaş manufacturing company in 2007 and put into operation the leading electrostatic powder coating plant in Turkey. Thanks to these investments, Işın Lighting has become the leader of the sector in Turkey, with many alternatives such as decorative polygonal poles, pipe poles, decorative aluminum poles and stainless steel poles in addition to the standard polygonal poles, it offers the services of a modern urban architecture.

Işın Lighting has become a well-known brand not only in Turkey but also abroad because of the importance it gives to investments and exports. Our company is raising the flag of our country day by day with the exports to Central Asia, Middle East, Africa and Europe. With its dynamic and innovative structure, the company is proud of making its name in a short time abroad as it is in the country.

cforeign.trade

C Foreign Trade Company is a subcompany of Ceceli Group. It is based on the exportation of high quality products which are produced in Turkey.

We are a business partner with the top-quality manufacturers in Turkey and experienced trade companies around the world. In addition to the supply of goods and services, we are now a recognized partner not only by private entrepreneurs from all countries, but also by government entities.

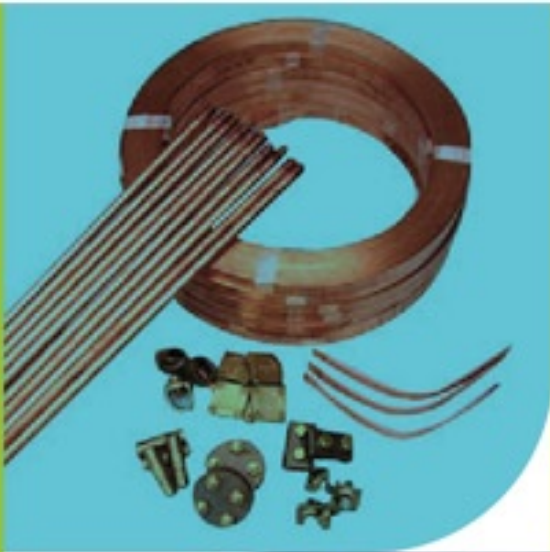

Our company is a young company founded in 2013. Our founding objective is to primarily supply engineering services and materials for the companies operating in the Energy and Telecommunication market.

Our company achieved to export to over 25 countries in the past 5 years and obtains averagely over 80% of its turnover from exports. The main objective of our company is to show the quality and the competitive advantages of Turkish products to our customers abroad and to bring them and these products together. In addition to this, our company conducts the necessary controls by our quality control department at every stage of production and audits the quality of products on behalf of our customers in order to make the customer standards of our company perceived and implemented correctly. By this means, both the possible errors in the eye of the manufacturer are prevented and/or fixed at early stages and our customers can be sure that they will receive a product in the quality and standards they desire.

Our next objectives are to reach our customers directly by becoming localised and to follow their demands and needs at first hand. With this aim, our company is always ready to maintain its growth by opening branches/offices abroad and to write new success stories in foreign markets with its Manufacturer partners.

www.omsetrade.com

The company, established by Ziya Büyükbektaş in 1970 in Karabük with the name “Serhat Nakliyat”, has entered into the private sector with transportation. The company’s name has been changed to Serhat Demir Ticaret ve Nakliyat Kollektif Şirketi and has put a stake in the ground to the iron and steel sector.

Earning its producer identity in 1987, the firm has realized its first industrial investment by buying a rebar mill and SERHAT HADDECİLİK A.Ş. has been established. In 1999, the firm has joined the SERHAT HAZIR DEMİR A.Ş. Grup Şirketleri in Ankara and has started to follow out the aims of steady growth step by step. Becoming one of the leading structural iron producers in Turkey in the course of time, Serhat Haddecilik is capable of producing over 250 different products by the year of 2016 and is also capable of manufacturing over 100.000 tons annual, which is the production capacity of today and over 200.000 tons of sales figure.

Moreover, with the aim of supplying the needs of raw material of the firm, SERHAT DEMİR ÇELİK A.Ş. imports with its expert staff and exports to several countries with the increasing production capacity. Accordingly, our firm contributes more to the national economy year by year. The market conditions of our country integrated with the world economy carries the competition into a more aggressive environment day by day. Especially in a field as the construction sector where the period of comeback is too long, the cost of each material is of vital importance. Serhat Demir Çelik A.Ş. has achieved to become a point of trust and reference with the quality of the structural iron that it produces in the iron and steel sector for years in Karabük and a diversified service manner.

Our pride is from steel!

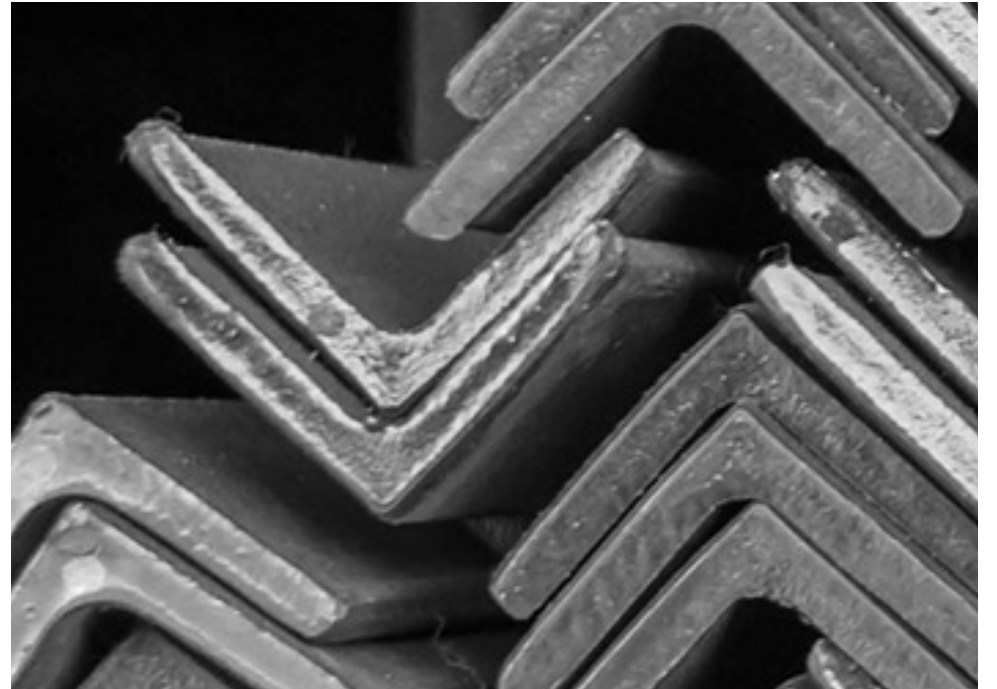

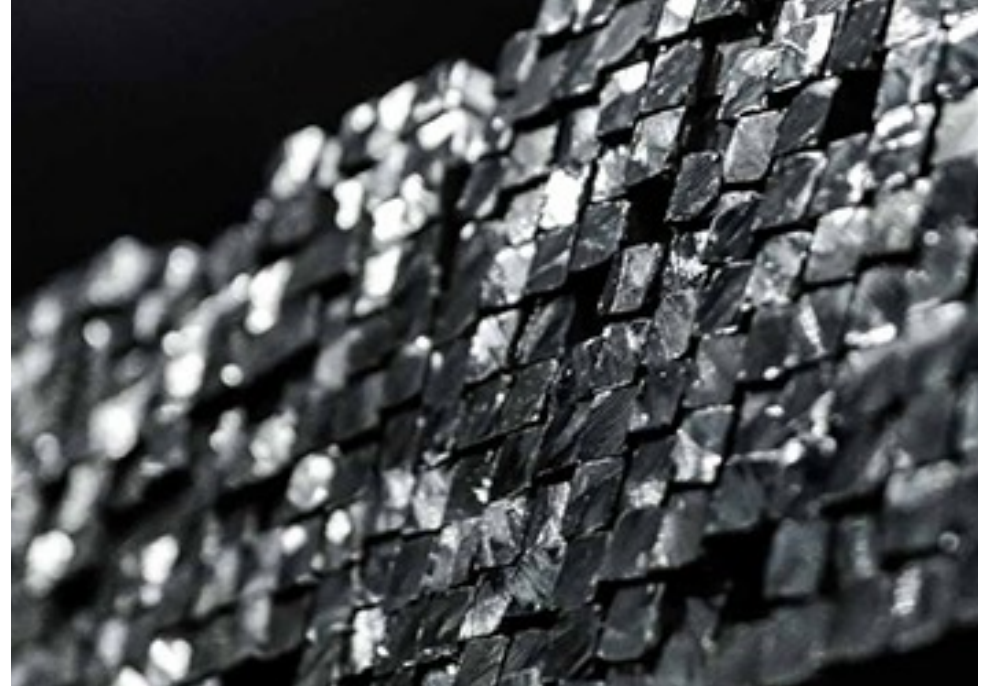

Serhat Demir Çelik A.Ş. has succeeded to be one of the pioneer institutions in the sector with the quality of mercant bars and rebars. Our facility is in service in Karabük with 4.000 square meters of open area and a closed area of 6.5000 square meters and in Ankara with 4.000 square meters of open area and a closed area of 4000 square meters, in total with an area of 18.500 square meters.

Our company, who has reflected the success built upon trust and sense of stability in domestic market for over years to the foreign market, is proceeding the activities in the international area at full pelt.
