

# ELECTRICITÉ OTHMANE EL GOUTE. SARL

MV/LV and HV Electrical Supply and Works Company  
Realization and Electrical Study and Public Lighting

## Company Presentation

**Siège sociale : Route safi Km 10 Harbil - B.P. : 7450 Sidi Abbad – Marrakech**

**Tél : 05 24 44 63 61 - Fax : 05 24 44 63 66 - E-mail : [othmane.electricite@gmail.com](mailto:othmane.electricite@gmail.com)**

**ICE : 000033025000046 - RC : 58819 - Patente : 64800151 - I.F : 14454670 - CNSS : 9695159**

**Capital : 6 000 000,00 Dhs – Compte bancaire BMCE : 011450000005210000737990**

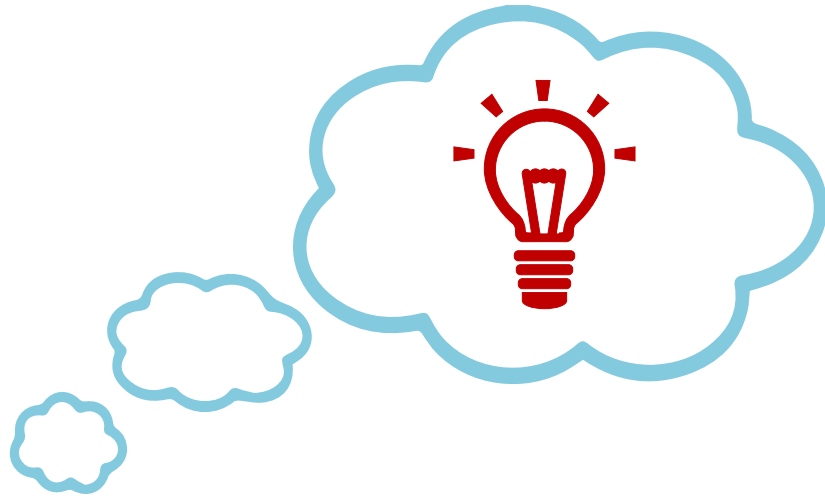

# Who We Are

***ELECTRICITE OTHMANE EL GOUTE***

One of the **top businesses** in Morocco for more than **15 years**

Transporting, transforming, and distributing electricity

have built more than **3000 km** of power lines **and 300 MV/ BT**

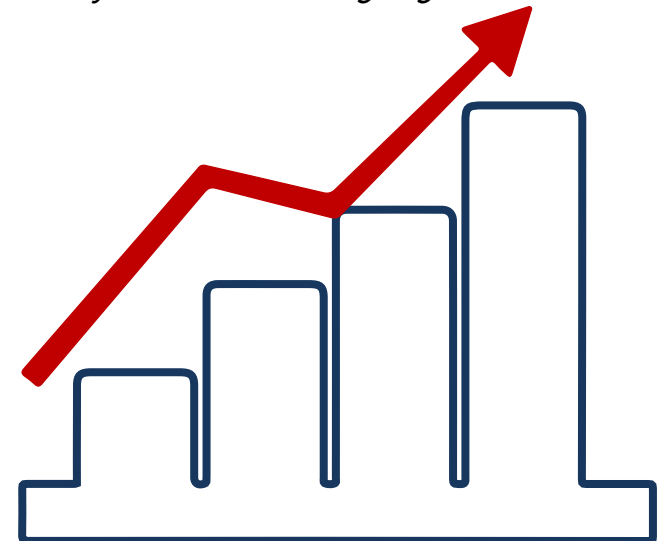

*We believe that our high level of trade expertise and our motivated personnel are the key factors for our ongoing expansion in terms of:*

**Revenue**

**Social Capital**

**Approvals (MT/BT3)**

# Our services

To ensure the smooth operation of the construction and reconstruction activities, we undertake the following:

## Study, projection and engineering

- Complete topographic studies
- Electrical and technical plan designs for the MV/LV networks.
- Mechanical sizing studies
- Civil engineering studies of substations;
- Engineering studies of MV equipment;
- Control of distribution of the substations commands.
- Lifting of poles;
- Foundation, assembly and lifting of pylons;
- Unwinding and adjustment of cables.

*At every stage of a project's execution, our design office is consulted for technical references.*

## Construction and assembly

- Assembly, construction and reconstruction of all types of transformer stations, all authorized models and their equipment, including civil engineering works and the supply of technologies.
- Construction of post-mounted transformer substations.
- Construction and reconstruction of external MV/LV lines.
- Installation of MV and LV cable trays.
- Assembly and dismantling of electrical equipment and individual connections.

## Civil engineering

- All Civil engineering operations of electrical equipment, buildings of distribution and transformation stations.

# Our Mission

We are capable to undertake all the necessary operations for the construction of MV/LV power lines

We provide:

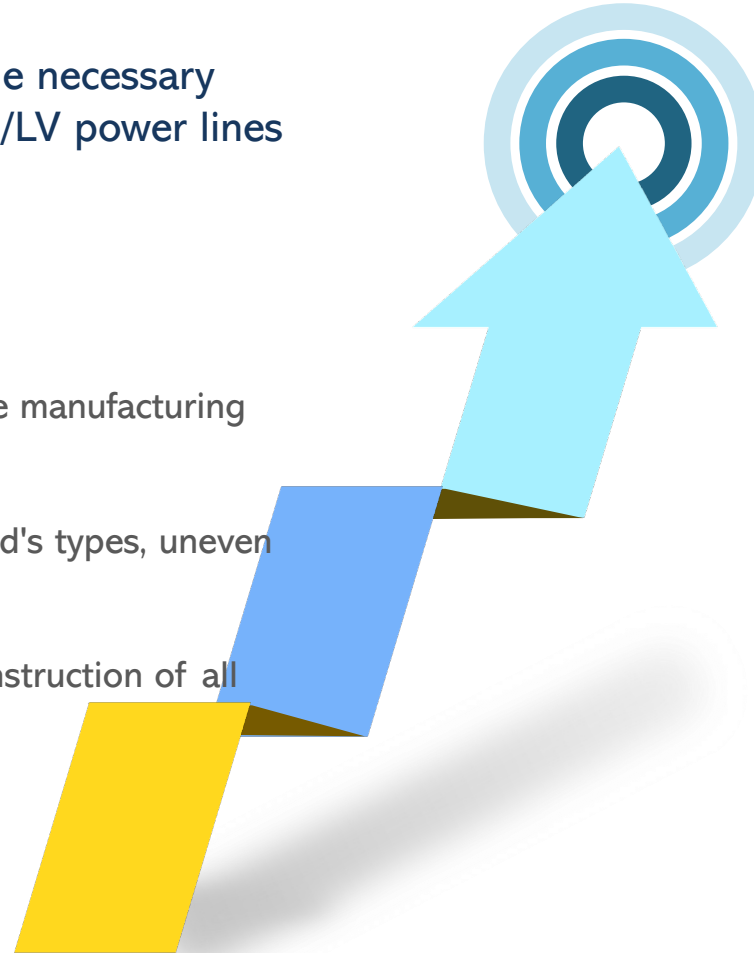

- An efficient and up-to-date metal frame manufacturing workshop.
- Lifting gears for interventions in all field's types, uneven and flat terrain.
- Teams of fitters experienced in the construction of all types of power line.

We are capable to undertake all the necessary operations for the construction of low voltage installation of transformer stations

Whether this intervention is part of:

- Extension project
- Restructuring project
- Turnkey project

we can meet the protection and control needs of electrical installations, depending on the customer's needs.

# Our Quality = Our Existence

“

*Today, our main objective is to satisfy all our customers in order to maintain the good image and the market share that we occupy. By deploying all our material and human resources. From there, we will be able to satisfy more markets as well as develop our area of expertise through research and development in the transport and distribution of electricity.*
