OVERVIEW OF THE COMPANY

NOURAZINOV, founded ten years ago, is an engineering firm that specializes in electricity and renewable energy.

It has expertise in technical studies, the development of MV/LV networks, the study and integration of energy efficiency solutions, and predictive maintenance.

Thus, the **NOURAZINOV** organization provides a broad spectrum of interventions, from project identification, research, and project management assignments, through structure commissioning and operation assistance.

NOURAZINOV has a network of equally skilled partners in numerous technological sectors in addition to its specialist multidisciplinary team, under the supervision of managers with high-level training and more than 30 years of experience.

The combination of technical understanding and practical experience implementing proposed solutions ensures operationality.
